

Overall Late Delivery Rate: 7.6% (7,372 out of 96,470 delivered orders)

93% On Time — But the 7% Drives the Damage

Average Delivery Performance by State (Days vs. Promise)

Late Deliveries Crush Customer Satisfaction

KEY INSIGHT

When packages arrive on time, customers rate their experience 4.3/5 stars on average. When deliveries go Super Late (5+ days past promise), satisfaction collapses to 1.7/5 — a 60% drop.

Late deliveries are not just a logistics problem; they are directly destroying customer trust in remote states (AL, MA, SE) where average delays are highest.

RECOMMENDATION:

Renegotiate carrier contracts and adjust delivery promises for the Northeast region to stop over-promising and under-delivering.
